Dear Wheaton Residents:

Wheaton Sanitary District (WSD) started construction of its Northside Interceptor (NSI) Sewer Replacement Project in May 2021 at the Wastewater Treatment Plant. WSD has been planning the NSI Project for about the last ten years. The NSI Project will replace approximately five miles of sewer pipe. That pipe was installed in 1926 and 1962. Due to capacity limitations, infiltration and inflow issues, and sewer and associated manhole deterioration, the pipe has come to the end of its useful life and needs to be replaced. The pipe will be upsized during construction to better accommodate the wastewater flow.

Work soon will progress from Roosevelt Road and Hazelton Avenue to Childs Street and head east. Construction then will go north on Woodlawn Street, east on Liberty Drive, and north on Knollwood Drive. At that point, it will go northeast on Manchester Road and under the railroad tracks. The pipe installation is expected to continue from now until the end of 2022. A map of the overall route/work is included for your reference on the back of this letter.

WSD is informing you of a **Community Meeting** to present information about the Project, to specifically discuss construction in your area, and to answer any questions. That meeting will take place **Thursday, February 17, 2022, 7:00 pm, at the City of Wheaton Chambers, 2nd Floor of City Hall**. Please note that the Wheaton Sanitary District is not part of the City of Wheaton, but the City was gracious enough to share their facilities for this meeting.

The primary contact during construction is the District's NSI Project contracted engineer – Jim Snell from Baxter & Woodman, Inc., Consulting Engineers. Jim can be reached via email at JSnell@baxterwoodman.com or at 815.444.3321. There will be on-going, periodically-updated, information about the Project on the District's News Section of its website, (www.wsd.dst.il.us/About-WSD/News). Thank you in advance for your patience during construction of this very important Project.

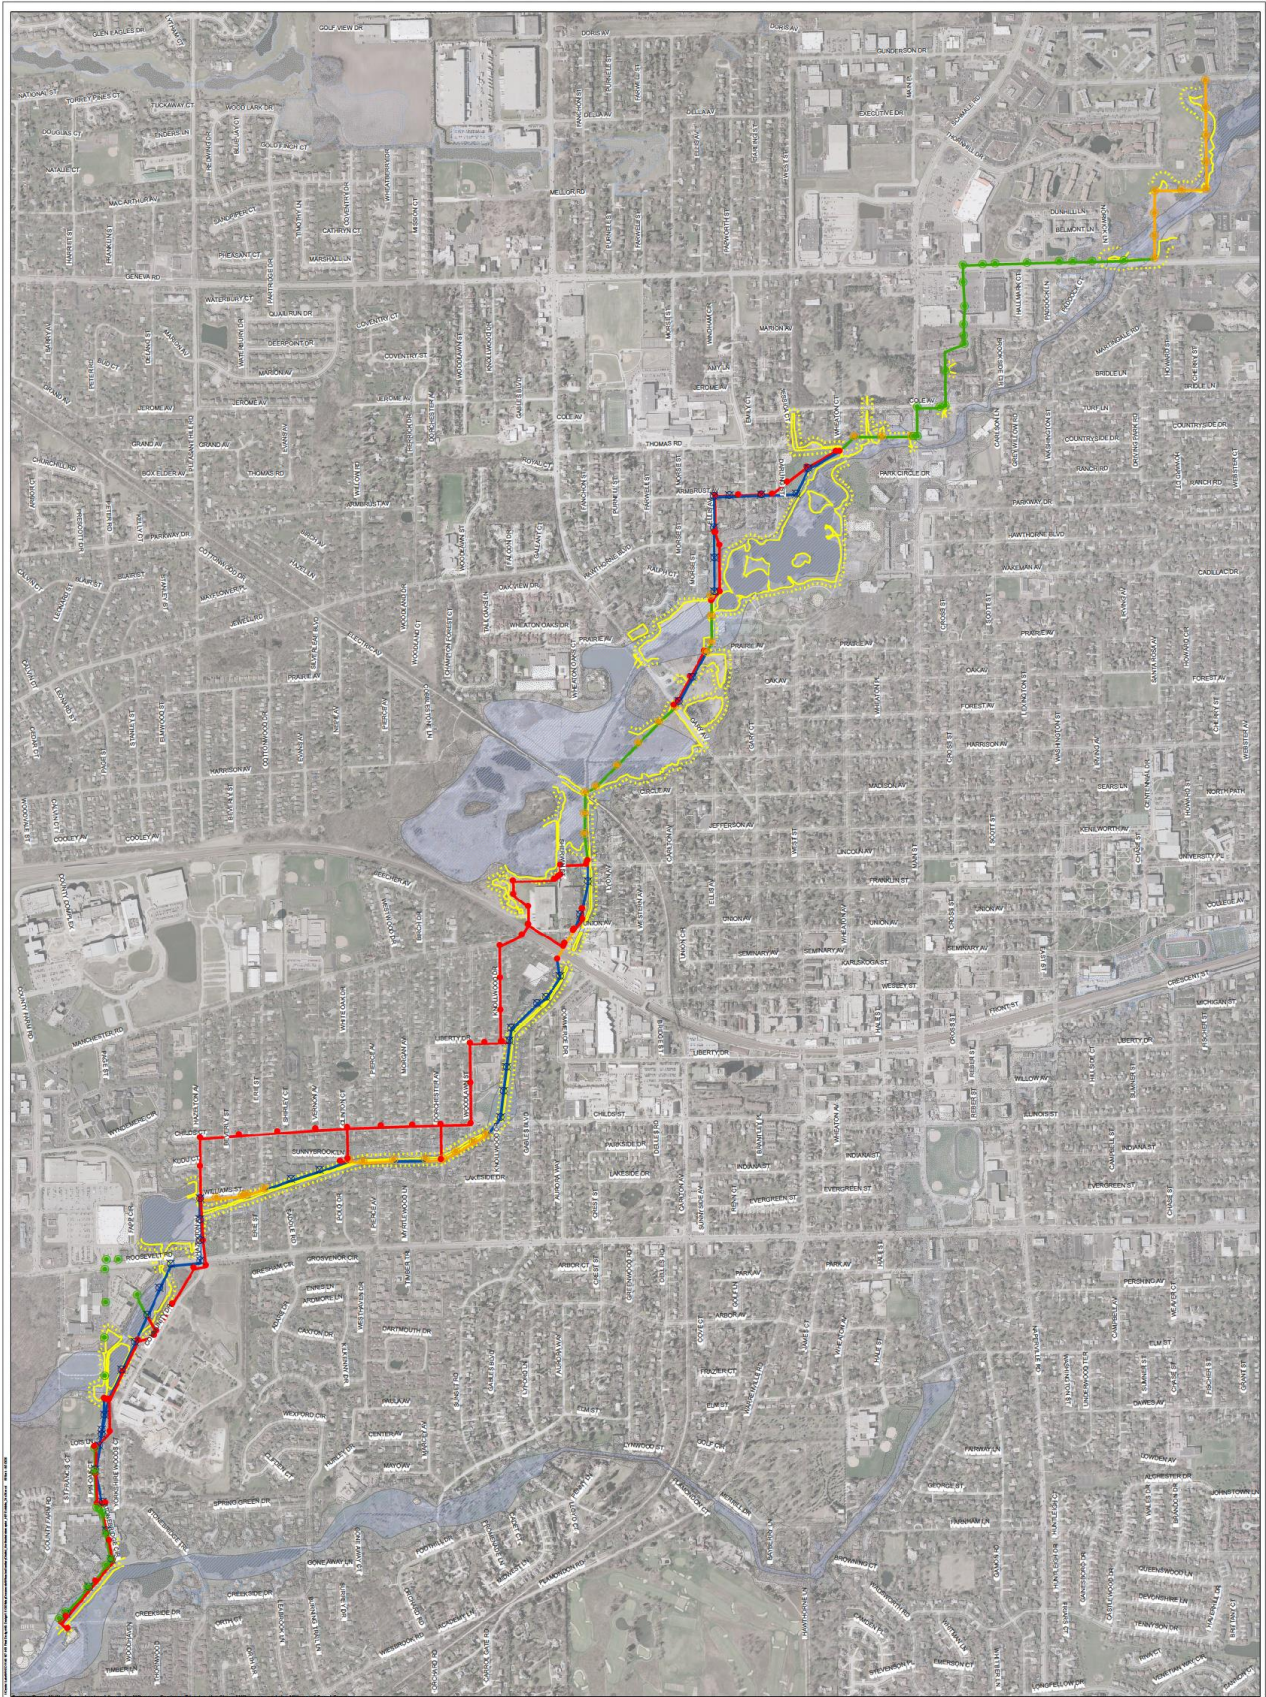

Very truly yours,

WHEATON SANITARY DISTRICT
