

NORTHSIDE PARK SCHEDULE UPDATE:

Heavy construction is now complete through the west side of Northside Park, Ellis Avenue, and most of Armbrust Avenue. Construction will slow over the holidays and resume in January. This will complete the work on Armbrust, allowing crews to start work in the Park off Darling and Armbrust. Work has proceeded as expected and the District is on schedule. Most of the restoration will take place in Spring, weather permitting. Temporary pavement has been installed for the winter months. The Morse Street entrance to the path is now open. Website updates will be provided.
